Weathering, Erosion, & Deposition Project

You will be teaching your classmates about weathering, erosion, and deposition! You will make a visual aid and then present to the class. Below you will see the requirements for this project, and the choices you have. Make sure to be creative and don’t leave anything out!

Requirements:

1. Your visual aid/presentation must clearly and correctly explain the following processes (6 points):
   a. Weathering
   b. Erosion
   c. Deposition

2. Your visual aid/presentation must include a real-life example of how the following processes are related (6 points):
   a. Weathering
   b. Erosion
   c. Deposition

3. Your visual aid must be neat, clear and easy for your classmates to understand, and on topic. Take your time and do your best! (6 points)

4. You must present your project to the class to teach them about weathering, erosion, and deposition. (6 points)
   a. Speak clearly and at an understandable pace
   b. Explain all parts of the visual aid
   c. If presenting with a partner, both partners must participate in the presentation

Choices:

1. You may choose to work independently or with one partner.

2. You may choose which format you would like to use for your presentation:
   a. Create a poster
   b. Create a Google Slides presentation
   c. Create a digital comic (http://www.readwritethink.org/files/resources/interactives/comic/)
